

# Net-FM 4.0

SQL Server and beyond...

- **Supported databases:**
  - Oracle 11g and above (all Net-FM modules)
  - MS SQL Server 2012 and above (Space Management and Space Survey for Net-FM v4.0)
  - Ability to migrate existing Net-FM database from Oracle to MS SQL Server
- **Single website codebase for both databases**
  - The Net-FM website can be configured to support multiple database connections

- **Simplified interface** for managing Net-FM users
  - Add New User wizard
  - User Templates for user privileges, module visibility, and column security settings
  
- **Password** expiration, password reset, and security questions
  
- **Encrypted user passwords** stored in database tables
  
- Net-FM application users no longer associated with database users
  
- **Audit trail of user logins**

- Enhancements to **Space Survey security**
  - Authorization key in Space Survey URL
- **Associate Space Surveyors** with Net-FM user accounts
  - Space Survey password management
- Ability to run Space Survey in same browser as Net-FM

- **Color coding** by Use, Organization, Function, and Feature Type
  - Setting to enable/disable color coding
- **Dynamic repositioning of Floor Plan legend**
- **Dynamic resizing of Space Label fonts and Legend fonts**
- **Direct link from Space Viewer** to Net-FM Space Management module

- **Asset/Accounting Documents**
  - Ability to view Asset documents from the Accounting module
  - Ability to add a document to either an Accounting record or to the associated Asset from the Accounting module
  
- **Asset Depreciation**
  - Ability to select records in a Depreciation Batch by Account Number
  - Ability to query Depreciation Details by Account Number

- **“Use in Statistics”** option for Facilities and Floors
  - Ability to exclude active facilities/floors from area calculations
- **Export to Excel** – choice of file formats
  - Excel/XML (open standard)
  - CSV
  - Binary Excel (.xlsx)
- **Drawing Conversion** privilege for non-Admin users
- **Documents**
  - Available in Move Management, Asset Accounting
- **Additional fields**
  - New customizable fields available in Use, Space Feature, Facility Feature modules

- **Multiple survey cycles**
  - Ability to manage concurrent survey cycles
  - Each cycle can have different settings and recipients
  
- **Move Management 2.0**
  - MS SQL Server support
  - Integration with Net-FM Asset Management module
    - Move reconciliation – Manage move items in addition to move occupants
  - Customizable fields

- **Asset Management**
  - MS SQL Server support
  
- **Documents**
  - Search capability
  - Shared documents
